Statistics Sheet Guidance

- This statistical analysis sheet has been designed for coaches delivering in Secondary Schools, at Club Level and County and Regional Competition
- Statistical analysis of players' performance should be used by coaches as an indication of both error rate and success rate

Shooting Statistics

- If the Goal Shooter and/or Goal Attack shooting is successful the number is circled
- If the Goal Shooter and/or Goal Attack shooting is unsuccessful the number is crossed. The number is circled if the shot is missed but a penalty is awarded or a rebound is won by player, and a successful shot follows
- If the player in the position of Goal Shooter and/or Goal Attack changes mid-quarter, use a vertical line to distinguish a change of player in that position

Centre Pass Conversion to Goal (Direct)

- The centre pass conversion to goal must be direct, with no errors made or a change in possession occurring
- If the centre pass is converted successfully and directly to goal, the number is circled
- If the centre pass is not converted successfully and directly to goal, the number is crossed
- A regain of possession from a centre pass would be identified as a turnover and indicated below as gained possession

Gained Possession

- Possession is gained from a turnover by a player
- A tick is noted next to the player who took the turnover to successfully regain possession per quarter
