

Overview of the Seat and Footstretcher Designs for the five Para-Rowing Boat Categories from the Rowing World Championships in Chungju, South Korea 2013.

The FISA Para-Rowing Commission and the Equipment & Technology Commission conducted a survey during the World Championships. Photos of all the seats and footstretcher set ups/ designs (that suited the athletes' individual needs) were taken and displayed in the following tables for the five boat categories:

ASM1x (n=12)
ASW1x (n=9)
TAMix2x (n=8)
LTAMix2x (n=4)
LTAMix4+ (n=6)

This document is provided as information and as a tool to assist coaches to understand the current trends in Para-Rowing.

Both commissions are keen to continue the tracking of the developments in the current boat and individualised seat/ footstretcher designs in the coming years towards Rio 2016 and to distribute them to the Para-Rowing Community.
